

CAMERAS LEFT UNSECURED (TECHNOLOGIST BENN JORDAN) · SCRIPT B

If strangers can watch the feed, cancel the lease

About 2.5 min at ~140 words/min · 344 words · Replace [Your Name]. Speak calmly. One speaker, one focus.

Tip: swap bracketed fields. Cite numbers carefully. End with the cancel / yearly-vote ask.

Mayor Crawford, members of City Council. My name is [Your Name], and I live in Crossville.

Please treat the Flock livestream exposure as a red flag for any renewal.

Benn Jordan, a technologist and independent researcher who documented the exposure on video, compared open Condor feeds, from Flock's pan-tilt video cameras that track people, to an open video service anyone could watch: live video, days of archive, and admin panels reachable without logging in. He filmed himself on Peachtree Creek Greenway feeds that tracked him. 404 Media's Jason Koebler recorded himself crossing a street median in Bakersfield, CA, and watched himself on the same kind of open livestream. Security researcher Jon Gaines, who publishes as GainSec, documented dozens of exposed interfaces. Separate cybersecurity research later catalogued dozens of findings and related CVEs, public vulnerability IDs, in Flock product lines. Local stations including Denver's 9NEWS and West Palm Beach's WFLX carried the story to ordinary viewers. These were not sealed police systems. Some feeds were simply out on the internet.

I do not claim Crossville's exact units were among the exposed set. I claim Crossville should not keep leasing from a vendor whose cameras were left open on the internet and covered by national tech press and local TV.

Public safety equipment that strangers can watch online is a liability and a betrayal of residents who never opted in. Please put the incident notices, the model list, and the contract security clauses on the record. Do not wait and hope the next failure skips Cumberland County. If someone with a search engine can find unprotected feeds, this city should stop paying for the product.

THE ASK (say this)

My ask is clear. Cancel Crossville's Flock contract and remove the cameras. Require a public hearing and a recorded City Council vote before any surveillance equipment is ever proposed again. If you will not cancel yet, take a recorded yes-or-no vote each year before any renewal, with no automatic renewal that skips a public vote, and publish monthly use reports the public can check. Thank you. I yield.
