

OPEN STREAMS, MISUSE, AND CEO (COMBINED CASE) · SCRIPT A

Open streams, misuse, and a CEO who attacks oversight

About 3.7 min at ~140 words/min · 516 words · Replace [Your Name]. Speak calmly. One speaker, one focus.

Tip: swap bracketed fields. Cite numbers carefully. End with the cancel / yearly-vote ask.

Mayor Crawford, members of City Council. My name is [Your Name], and I live in Crossville.

I support public safety. I do not support leasing citywide surveillance from a company that has failed on security, enabled abuse, and attacked citizens who ask questions.

First: the cameras themselves. In late 2025, technologist Benn Jordan found Flock Condor cameras live-streaming on the open internet. No username. No password. Anyone with a link could watch live video, download about thirty days of archive, and change settings. Security researcher Jon Gaines expanded the find. 404 Media verified roughly sixty exposed cameras. Reporter Jason Koebler recorded himself crossing a street median at Harris Road and Young Street in Bakersfield, CA, and watched himself livestream while colleagues watched remotely. Jordan filmed himself on Peachtree Creek Greenway feeds that auto-tracked him. Local TV, including Denver's 9NEWS and West Palm Beach's WFLX, confirmed exposed police camera feeds. Flock called it a "limited misconfiguration." That is a product-security failure, not an activist rumor. If this vendor left live police cameras on the public internet, "trust our cloud" is not a policy Crossville should keep buying.

Second: misuse is not rare. It is a pattern. In Milwaukee, WI, an officer searched a woman he was dating and her ex nearly one hundred eighty times, then resigned and pleaded guilty. One of the detectives who investigated him was later charged for misusing the same system. Georgia newsrooms this summer covered a wave of firings and arrests. Savannah put six employees on leave over alleged personal searches. Closer to home, Oak Ridge's Zachary Gauthier ran personal Flock searches, pleaded guilty to official misconduct, and was sentenced. Cities also face lawsuits in Huntington, WV, Wichita, KS, and California. Taxpayers keep the downside. Flock keeps the lease check.

Third: look at how this company's CEO treats the public. In December 2025, Flock CEO Garrett Langley emailed police clients that they were under a "coordinated attack" from activists who want to "defund the police... and normalize lawlessness," and that people were "trying to turn a public records process into a weapon." In a Forbes interview, he also called people who map publicly visible cameras a "terroristic organization," closer to Antifa than to lawful advocacy. Staunton, VA, Police Chief Jim Williams, a forty-one year police veteran, answered him straight. He said residents raising concerns were exercising their rights. He called that "democracy in action" and rejected the CEO's attack narrative. The City of Staunton, VA, cancelled the contract. The city said the CEO's narrative does not reflect its values.

Crossville does not need to wait for our own open feed, our own stalking case, or our own lawsuit.

THE ASK (say this)

My ask is clear. Cancel Crossville's Flock contract and remove the cameras. Require a public hearing and a recorded City Council vote before any surveillance equipment is ever proposed again. If you will not cancel yet, take a recorded yes-or-no vote each year before any renewal, with no automatic renewal that skips a public vote, and publish monthly use reports the public can check. Thank you. I yield.
