

MORE THAN PLATES (PATENT VS MARKETING) · SCRIPT B**More than plates, and a council that caught the lie**

About 2.6 min at ~140 words/min · 360 words · Replace [Your Name]. Speak calmly. One speaker, one focus.

Tip: swap bracketed fields. Cite numbers carefully. End with the cancel / yearly-vote ask.

Mayor Crawford, members of City Council. My name is [Your Name], and I live in Crossville.

Please stop treating Flock as a simple plate camera. What is already shipping, and what Flock told another city council, shows a pattern of selling less than the system can do.

Already in the product line: Falcon markets Vehicle Fingerprint, make, model, color, and markings, not plates alone. FreeForm advertises searching people by clothing descriptions across video. Condor is a pan-tilt camera that detects human movement and can acquire and track a person as they walk. Multi-Geo and Convoy tools turn travel and cars that move together into searchable association records. That is pattern-of-life tooling, not a tollbooth snap.

Separately, look at honesty. In April 2026, Oshkosh, Wisconsin, asked Flock in open meeting whether the system creates a heat map of a vehicle's movement. Flock's chief information security officer said no, that is not available. The next morning, Police Chief Dean Smith said the system does create heat maps. Council rescinded the contract the same day, seven to zero. The ACLU later put Oshkosh in a July 2026 report on Flock misleading councils and the public. Flock called the dispute a "minor nuance."

One more accuracy point, because this gets confused online: Flock's main people-and-video patent is about AI analysis of camera footage, including person classification and face-recognition data points in the specification. Phone radio scooping is a different ALPR-market product line, Leonardo SignalTrace, pitched to correlate plates with phones and Bluetooth IDs. Crossville should ask in writing what sensors sit on every pole, and refuse both people-search creep and phone-ID add-ons.

If a vendor understates heat maps to a council, and patents people classification while marketing "no facial recognition," Crossville should not renew on trust.

THE ASK (say this)

My ask is clear. Cancel Crossville's Flock contract and remove the cameras. Require a public hearing and a recorded City Council vote before any surveillance equipment is ever proposed again. If you will not cancel yet, take a recorded yes-or-no vote each year before any renewal, with no automatic renewal that skips a public vote, and publish monthly use reports the public can check. Thank you. I yield.

Oshkosh, WI — April 2026

Council asked in open meeting: does the system create a heat map of a vehicle's movement from aggregated plate images?

Flock CISO answer (public meeting): "No, that is not available."

Next morning: Police Chief Dean Smith said the system does create heat maps. Council reconvened and rescinded the contract 7–0. ACLU later cited Oshkosh in a July 2026 pattern-of-misrepresentation report.
